

# THE GLOBE AND CALL

VOLUME XXXI NO. 28 GLEICHEN, ALBERTA, WEDNESDAY SEPTEMBER 28, 1936 SUBSCRIPTION \$2.00 PER YEAR

## GLOVE MAKING DEMONSTRATION ENJOYED BY U.F.W.A.

Mrs. A. Quennell was hostess to the ladies of the U.F.W.A. last Thursday afternoon. The meeting was opened by singing the "Long, Long Trail". The minutes of the last meeting were then read following which much correspondence was dealt with.

A letter was read from Mrs. J. C. Hutchison who is at present visiting at Morris, Ill., stating that she was improved in health. Mrs. Hutchison who has been sick for some time was able to attend the meeting and is much improved in health. Letters of thanks for flowers were received from Mr. F. Daw and from Mrs. Hutchison. Mrs. Hutchison thanked the organization for the flowers sent her while she was in the hospital. A bulletin on Utopia and on Education by radio was read by Mrs. McLeay.

A new member was added to the U.F.W.A. list being Mrs. J. Wilson. It was decided to order cook books for those members who desired them. Much discussion took place on the lower show which was held on account of the heavy rain that occurred on the date set for the show. Nominations for the position of secretary was next in order and Mrs. McLeay was elected for the remainder of the year. A quiz contest was set on by one of the members for the prizes went to Mrs. H. Burns, Mr. and Mrs. Quennell and Mrs. Hutchison. The tea for the evening, served by the hostess and every one declared they had spent a delightful afternoon.

The members will meet again on October 6th at the home of Mrs. W. McKeever.

## THE WORLD OF WHEAT

R. B. L. Savage, Director of "Crop Testing Plan"

"Where can I obtain large quantities of reasonably good seed of the variety I want? I cannot afford to buy registered or certified seed for the two or three hundred acres that I shall sow."

I am receiving many queries like this from farmers who desire to change to a new variety over their whole farm.

My advice to those who require a large quantity of good seed and of good quality, is that they should acquire from their neighbor agent for the names of their neighbors whose samples graded "A" this summer in the "Crop Testing Plan" plots.

"Crop Testing Plan" "A" stock is true-to-type to a good standard of excellence; and passing the test "A" is becoming more and more recognized as a mark of good seed.

Moreover, farmers who have stocks in their bins which graded "A" are usually willing to sell to their neighbors for a very small premium.

This year's "Crop Testing Plan" work revealed about ten thousand farmers in the west who had "A" stocks of Thatcher, Benary, Red Bobs, Garnet, Reward or Marquis.

Such "A" men, by selling to their neighbors, are certainly helping to improve the welfare of their fellow farmers.

Following factors have tended to raise price: Germany's decrease in domestic necessity of corn mixing with wheat flour; unfavorable reports about German potato crop. Decrease in wheat crops harvested in China, Manchuria and Japan. Rainfall insufficient for ploughing and seeding in Russia and the Balkans. High ocean insurance stops Indian wheat sales.

## THE UNIVERSITY PROGRAMS WILL GO ON AIR THIS WEEK

Commencing its 11th year of broadcasting activities, the University will go on the air at 7 o'clock on Wednesday, September 28th with its opening program for the fall season.

## Queen's Hotel Changes Hands

The largest deal that has taken place in Gleichen for many years took place last week when the Queens Hotel changed hands.

The new owners are Messrs. Campbell and Thomas Brown purchasing the property from Mr. Stubbs who has operated the hotel for the past 12 years. The purchase of the business by Brown Brothers came as a complete surprise to almost everybody in town as no word of the negotiations had leaked out. It has been known for sometime that Mr. Stubbs wished to sell the hotel and retire, several prospective buyers having been here and looked the property over. The hotel was erected at Alderson and was moved here a year or two after the big fire in 1924 which wiped out the Gleichen Hotel along with much other property.

The Queens Hotel is well known to the travelling public and has the reputation of being one of the best kept hotels in any country point in Alberta.

The new owners, Cam and Tom Brown as they are best known to their many friends have lived in Gleichen most of their lives, a little over twenty years to be exact, here they attended school and since they quit school have had an interest in the Red and White Store. For many years they have been star performers on the Gunner hockey team, in fact have been main stays of the team.

The Call joins with their many friends in wishing Tom and Cam every success in their new venture.

## ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Born to Mr. and Mrs. Stewart Hayes a daughter on Sunday Sept. 28th.

Should all be found in Stevelille there are 17 persons in Gleichen, 1 in Arrowwood, 1 in Cluny and 2 in standard who will have a chance to ride around in limousine.

Announcement has been made of his marriage of a former Gleichen resident and hockey player, DeForest (Tiger) Lyon to Elizabeth, daughter of Dr. and Mrs. John W. Duckett of Houston, Texas, on September 17. The wedding took place at Houston.

Word was received in town Monday that Earline Norbert, for many years a resident of Cluny, had died that morning in an Edmonton hospital. Mr. Norbert left Cluny some four months ago to reside in the northern city and has lived there since that time.

Mr. T. W. Bates, Sr., returned to her home in town after spending the past two months visiting with her three sons James, Hugh and Frank at Kimberley. B. C. Mrs. Bates states she enjoyed her visit very much and looked forward eagerly for the arrival of The Call each week. She is glad to be back in sunny Alberta again.

The old fashioned hobby of collecting brightly colored maple leaves has been put on a cash basis with the announcement that \$215 in prizes will be awarded in the sixth maple leaf contest organized jointly by the Canadian Travel Bureau, the Canadian Pacific Railway and the Canadian National Railways. The contest now in its sixth year, is an effort to add to the cash prizes, the maple leaves of which will soon be tinted beautifully by autumnal frost. In addition to the cash prizes, the railways are offering the inducement of special excursions and cheap rail tickets to encourage city-dwellers to return to the simpler joys of their forefathers. Hundreds of Canadian have been gaining a new appreciation of Canada's forests as they searched the woods for leaves big enough or pretty enough to win a share of the \$215 prize list. The hope of producing the most beautiful leaf went to Ontario for the first time last year. New Brunswick and Quebec having each won twice. British Columbia has had a monopoly on the largest leaves in past years, last year's winners being 21 inches by 22 inches with surface area of 284.3 square inches.

## EARL ETHERIDGE IS THE REAL KING OF MURPHIS

In last week's Call we got L. Michael's Murphy story somewhat garbled and did not give credit for growing the giant to the proper person. It happened like this. Mr. Michael presented us with the three round tuber without comment so we naturally concluded he raised it in his garden but such is not the case. Credit for growing the great spud must be given to Earl Etheridge as he found it in his garden. Therefore Mr. Etheridge is the district's spud king. No body has as yet come forward with a larger spud to demonstrate what they could do. The size of Mr. Etheridge's potatoes against the pounds, thirteen and a half inches circumference around the middle and twenty one and a half inches circumference from end to end.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

You Tang-a-Chinese cook employed by Harold Dunn, one a horrible death Tuesday morning when the 14th street stiffs was moving ramp. It is said that Tang had opened the back door and fell under the wheels of the moving car and one of the wheels, which are made of 2x4 timber, passed over his left leg and tore it from the body and the bones were also protruding from an ugly wound in his side. Coroner Farquharson, who was called to the scene decided an inquest unnecessary.

R. Dananup the popular manager of Richard and Tuck's store has returned to town after a holiday in Banff.

The other afternoon an old time Gleichen scene was enacted on Fourth avenue-four teams ran away. Excepting Indian teams and work teams horses are seldom seen on the streets any more, auto having taken their place. Thursday a number of Indian teams were tied to the railing at the foot of the street when one team became frightened and bolting along the railing broke the tie straps of three other teams. Swinging around the four teams started abreast up the street. One team crowded off bridge between the two restaurants fell into the creek, sustaining slight damage and breaking the wagon pole. Another team got loose, forcing the driver to Grisdale street. The third team was topped soon after starting, while Miss Williams caught the fourth team at her home, two miles north of town. When this last team got just out of town a sack of flour and a gun was seen swinging in the air in the wagon box. Then a shot was heard and the team disappeared.

Thrashing is practically over in the Queenstown district. It is the shortest thrashing season ever experienced in that district since 1910 and most of the farmers with it was longer. Everybody has some crop and it ran all the way from 200 bushels to 5,000 per individual farmer. Not very many came up to the last figure. The average yield of wheat per acre is about 13 bushels.

Crops. Park left last week for Montreal, after spending a couple of weeks here vacationing. He is now forman of military stockyards at Montreal.

Mrs. Ethel Dalton has returned to Seattle, Wash. after visiting with her sister Mrs. Thomas.

During the past week there has been an important change made in one of Gleichen's leading business houses, J. A. Ramsay having sold the Busy Store to Messrs. Webster Bros of Banff. Messrs. Webster are the business on October 1st. Mr. Ramsay has also disposed of his Cluny branch but is not prepared to make further announcements at present.

The request to conserve gasoline was well observed in Gleichen on Sunday. We only saw two or three autos out that might have been out on joy rides, but even in this we were very likely misled. The local garages were closed up tight and it was the quietest day experienced in Gleichen since the snow disappeared last spring.

## COMING EVENTS

Oct. 1-June W. C. T. U. at Lyle Brownie House Cooking in Gleichen. Mail 3 to 6 p.m.

## EACH GRAIN PRODUCER

Knows the facts about the formation of the Wheat Board, and knows, in his heart, what his own actions should be.

## Alberta Wheat Pool

## TOWN OF GLEICHEN Property For Sale

Lots 18 to 15 Block Buildings 25 to 27 Garage 31 to 33 Residence 6 & 7 H Residence M 4 Office Building 2 House and barn

Information concerning any of these properties can be obtained at the Town Office.

Tenders for the purchase of the above properties will be received by the Secretary-Treasurer, Town of Gleichen up till noon September 30th, 1936.

Highest or any tender not necessarily accepted.

W. J. PHYTHIAN, Secretary-Treasurer.

CHAPTER IV.—Continued

"The days were growing longer. Spring followed winter in its climatic farther south, summer was on the way. But up here, everything remained under a burden of white. Hammond glanced far to the right.

"One less moose," he said, "There's Olson with a supply of meat! The pack that man can carry!"

They watched him angle across the drifts toward the main trail, his rifle dragging, the hind quarters of an Alaskan moose on his back.

"Think I'll go beg some of that," McKenzie Joe said. "The way those men are coming into this country, there won't be a lot of game left."

"Get an extra piece, will you?"

"Sure. For that girl!" McKenzie Joe started away. "Guess you're right—guess she's just like the rest of us—tried her own grub and fed up with the stuff they hand out at the Stillsington."

Soon McKenzie Joe, two great hunks of moose meat, fresh in his grasp, halted beside his partner.

"Well, here's the meat and there's the rest of the moose burners," he said. "Bergant Perry came along with 'em. Breakup's hit below. Wet snow most of the way until the last 40 or 50 miles."

Hammond took the unwrapped meat and started away. His course led through a maze of tents, dog huts, dirty snow piles, and shovelled away to reveal the foundation for a moss-inked cabin or shack and uprights of new buildings, the latter an output from a portable sawmill brought in over the snow. At last, he sighted a tiny log cabin; he and his partner built it for Jeanne Towers. Then he saw the girl.

She broke from the door at his approach, running, almost sprawling

Hammond laughed. "Always check up on the fellow who's made the strike!"

"Certainly—first job of a good geologist."

"You know your mining, eh?"

Jack jerked his head. "My cabin's right here. Walk over!"

"Glad to," Kenning answered. "Fine. I've a drop or two of Scotch left." Impulsively he laid a hand on the shoulder of Jeanne Towers, as she took the moose meat he had brought her. "You'd better hurry up to your porch and see what you're going to buy for your store when break-up comes."

"What I wanted to pay you—"

"No!" He patted her shoulder again. Still somewhat dazed by sudden wealth Jeanne Towers replied. "No!" This was new. "Who?"

turned to her cabin. Hammond caught eagerly at his companion's arm.

"Listen," he said. "I can't wait. Tell me all about Kay. Is she coming up here? Did she? Well, I mean it—your know—treating me like she cared something about me!"

Weeks later, he still was asking the same questions. He and Kenning stood on a side hill, where forgotten blooms at the edge of retreat, drifts, and the blue of twilight contrasted with the first buds of mountain rhododendron.

Spring had come as if a book had been opened and a chapter turned. The streams, only ten days before constricted by tons of ice, now roared to the outpouring of a thousand mountain slides. Every gully contributed its rivulets, every creek its rivulets, every stream its rivulets. Below in the village, the sound of hammer echoed endlessly. With water at hand, stalling and halting of the gold-seeking the thoughts of a new civilization had turned to building. That is why Hammond and Kenning had come up here to the hill. Back of their stood a new cabin—the one Hammond had promised Jack Joyce he would build for him.

"Great view from up here," Kenning said at last.

"They could look down on the big lake; a moose feeding in a far-away, shallow bay, a few miners fishing in the clear water just off the one you get from your place," Hammond answered. Kenning had built his cabin on the hill.

They went there for a drink, the last of Kenning's supply. Then, with a sudden, he turned to Hammond, who had dropped down the hill. At last, he walked through the snow, and he was back in the huts of Loon creek and toward Jeanne's tiny store. She was alone there.

He paused at the door to watch her. She was busy with a rough basket when she noticed Hammond's presence, and with a quick smile disintegrated her work.

"Hello!" she said. It was a welcome, a greeting and an abstinence all in one.

"Hello," he answered casually. "Still got your two hundred dollar?"

"Oh, I've hidden it." Then, "You missed the excitement. Sergeant Terry just got a customer for the lot."

"Oh, that Jorgeson fellow. He got in a fight with his wife. He must have broken her up terribly."

"To bad. She complained, eh?"

Jeanne shook her head.

"No—she stood for it. Somebody else told Terry. Her kind is always afraid to complain. People say they're not married."

Jack laughed.

"Well, she's lucky at that. Not being tied to him."

"Yes, I remember." For an instant Hammond travelled far away, back to the dock in Seattle, with a man throwing his morning gown on smooth waters, with Kay in his arms.

"You didn't happen to bring me a letter?"

Kenning laughed. He was a sure-appearing man, muscular, at home in the snow. Maybe that's why he had been at home in dinner clothes.

"No letter—but a lot of messages."

"Do you know each other?"

Jeanne Towers asked.

"We're old friends of the same family. I was picked up by a dozen of you after this long trip. We'll have to spend some time together."

"Just a minute."

"Yes, with today's bunch. I tried to fight the gold fever. Couldn't. So I am."

Hammond glanced again at the money, clutched in Jeanne's white hands.

"I can say this for you. You work fast."

"Don't!" His smile was disappearing. "Queer how it turned out. I went into Miss Towers store for some tobacco. Got to talking about gold. Of course, I asked what you were doing."

flaps cutting down its speed, it slipped still nearer the lake's edge, snarled anew, and cut off again. Sprayed like plumes of jetting steam from its pontoons, snatching and splashing, it kept the water in great leaps, settled again, ploughed onward. Walk over!"

"Glad to," Kenning answered. "Fine. I've a drop or two of Scotch left." Impulsively he laid a hand on the shoulder of Jeanne Towers, as she took the moose meat he had brought her. "You'd better hurry up to your porch and see what you're going to buy for your store when break-up comes."

"They could look down on the big lake; a moose feeding in a far-away, shallow bay, a few miners fishing in the clear water just off the one you get from your place," Hammond answered. Kenning had built his cabin on the hill.

They went there for a drink, the last of Kenning's supply. Then, with a sudden, he turned to Hammond, who had dropped down the hill. At last, he walked through the snow, and he was back in the huts of Loon creek and toward Jeanne's tiny store. She was alone there.

He paused at the door to watch her. She was busy with a rough basket when she noticed Hammond's presence, and with a quick smile disintegrated her work.

"Hello!" she said. It was a welcome, a greeting and an abstinence all in one.

"Hello," he answered casually. "Still got your two hundred dollar?"

"Oh, I've hidden it." Then, "You missed the excitement. Sergeant Terry just got a customer for the lot."

"Oh, that Jorgeson fellow. He got in a fight with his wife. He must have broken her up terribly."

"To bad. She complained, eh?"

Jeanne shook her head.

"No—she stood for it. Somebody else told Terry. Her kind is always afraid to complain. People say they're not married."

Jack laughed.

"Well, she's lucky at that. Not being tied to him."

"Yes, I remember." For an instant Hammond travelled far away, back to the dock in Seattle, with a man throwing his morning gown on smooth waters, with Kay in his arms.

"You didn't happen to bring me a letter?"

Kenning laughed. He was a sure-appearing man, muscular, at home in the snow. Maybe that's why he had been at home in dinner clothes.

"No letter—but a lot of messages."

"Do you know each other?"

Jeanne Towers asked.

"We're old friends of the same family. I was picked up by a dozen of you after this long trip. We'll have to spend some time together."

"Just a minute."

"Yes, with today's bunch. I tried to fight the gold fever. Couldn't. So I am."

Hammond glanced again at the money, clutched in Jeanne's white hands.

"I can say this for you. You work fast."

"Don't!" His smile was disappearing. "Queer how it turned out. I went into Miss Towers store for some tobacco. Got to talking about gold. Of course, I asked what you were doing."

## The Way To Peace

Britain And U.S. Set Good Example To European Leaders

Joseph Kennedy, United States ambassador, gave Europe's leaders a tip-to follow the example of Great Britain and the United States in their efforts to achieve peace.

He expressed confidence that the principle of "good natured settlement" would "keep us out of wars."

The ambassador spoke at a luncheon preceding a ceremony at the Cathedral of Aberdeen.

His reference was to settlement of British and American claims over Canton and Enderbury islands in the South Pacific by which both countries decided to use them in common.

"Fighting, whether called war or not, and threats of fighting come from the impotence and inability of leaders to work out pacific settlements," he said.

"We believe we have just witnessed an example of good-natured settlement of a profound difference of opinion between Great Britain and the United States—a cameo of the world settlement might be the same intelligent good-neighbors were always exhibited by different nations."

## Just As A Protection

Any Horse Shies When It Senses A Lurking Danger

Our Dumb Animals says horses dependent on fleet-footedness for safety were creatures of the plains. They held their heads high so they could be on their feet instantly, ready to flee. A horse at rest, however, because, in the wild, many enemies lurked in roadside herbage. When it lies at rest, it does so facing the point of danger, and is ready on its front feet first, that it may the more easily discover it. A colt raised in the city, however, never grows, ready to run at the moment's warning.

## Hunting For Policy Holder

Insurance Company Hauls Credit For Former Ottawa Resident

A "net egg" awaits Mrs. Dollie Rodgers, former Ottawa resident, if and when she is located. Mrs. Rodgers invested in an insurance policy for 25 years there has been a credit coming to her, with interest. The Ottawa office of the company has asked Hamilton police to help locate Mrs. Rodgers, who lived there for 25 years. The amount of the credit was not disclosed.

## Cause of Crash

Failure of Wing Tip Responsible For Plane Accident

Failure of the right wing tip of the airplane was the cause of a crash at Yorkton, Sask., on May 29 in which R. L. Fletcher, pilot, and David Brown, pupil, lost their lives. A board of inquiry has reported to Hon. C. D. Howe, minister of transport.

The board found the wing tip failed while the machine was being manoeuvred out of a steep rise following a spin or a steep spiral, and that the whole wing subsequently collapsed, making the aircraft uncontrollable.

An examination of the broken pieces of wing, the report said, indicated the main structural members were of sound material. The evidence indicated the original cause of the failure was the breaking of the drag bracing wires.

## Trick of Magician

Catches Bullet, Fired From Rifle, In His Mouth

Pit Bull Poofers from Canada and the United States closed a three-day convention at Fort Erie, Ont., with Magician Ted Ansemann, New York, who drew a crowd of 1,000 by apparently catching a rifle bullet in his mouth.

Police Chief Andrew Griffin marked the bullet and later identified the slug which Ansemann spit out after a British army rifle was fired at him from an open mouth from a distance of about 40 feet.

The Pit Bull Poofers, a group of amateur or professional magicians, meet each year to exchange tricks.

## Doctors Are Loyal

At the request of the committee of imperial defence, the British Medical association asked more than 4,000 doctors what they would be prepared to do in the event of a national emergency. Only 1,787, just over four per cent, replied that they were unwilling to do anything.

San Francisco dispatches say the world is threatened with a shortage of caviar. A lot of people will have to continue to get along on beef stew and hash.

Placer Gold in Yukon

Total Production Last Year Was Valued At \$2,045,000

Placer gold mining in the unglaciated areas of Yukon shows promise of continuing as an important industry for at least another 50 years, according to the Department of Mines and Resources, Ottawa. The Klondike district, chief Canadian source of placer gold, and the main field in the unglaciated area, alone contains still unproved reserves to keep most of the dredges now operating or under construction in operation at least 25 years.

Development along modern engineering lines is showing that the Klondike district, which has been a source of placer gravels than was formerly regarded as probable, and large areas of probable and possible gravels still remain to be tested. Total placer gold production in Yukon in 1937 was 58,346 fine ounces valued at \$2,045,000, and the total value of all mineral production from the Territory to the end of 1937 is \$21,644,000, of which \$19,250,000 represents the value of gold production.

## Are Expert Swimmers

Phalaropes Have Characteristics Different From Other Canadian Shore Birds

The Canadian Resources Bulletin says phalaropes, which are among the most delightful of Canadian shore birds have some unusual characteristics. First they differ from most other shore birds in being expert swimmers.

The female unusual feature about phalaropes is their home life. The female phalarope takes the initiative in courting rites, and makes the first advance toward the male. The females are larger, handsomer, and wear brighter plumage than the males.

After Mrs. Phalarope lays her eggs, medium between her feet to push her into the water. She then often to join other ladies of leisure of her own kind in socialable flocks, while the obedient and faithful Mr. Phalarope incubates the eggs and shoulders practically all of the cares and worries of the household.

Plans being made for the new stadium in Nuremberg, Germany, call for a seating capacity of 400,000, making it the largest in the world.

Probably the greatest danger facing many people today is not so much the danger that they will do something wrong as the danger that they will fail to do something right.

"What is a necessity?"

"A necessity is anything you can go without in order to make a down payment on a luxury."

It is a mistake to tell all you can, spend all you have, tell all you know or show all you feel.

**Wrigley's Gum**

As recommended by dentists, Wrigley's Gum is an aid to strong, healthy teeth, cleanses them of food particles, and helps you keep your teeth healthy, helps you keep your teeth healthy, helps you keep your teeth healthy.

**Town & District**

Mrs. J. A. Renaud who has been ill lately is improving nicely.

Miss G. Wilkie of Calgary is at present visiting Mrs. Lancy Koefoed.

Mr. and Mrs. Clifford Thompson and son of Calgary spent Sunday at the home of Mr. and Mrs. Harry Scott.

Mr. and Mrs. Ted Kelley of Vancouver spent Sunday with Mr. and Mrs. Duggan McBean. Mrs. Kelley is a niece of Mr. McBean's.

W. F. Erford accompanied by his brother Joseph of Carlyle, Pa., who has been visiting here for several weeks, spent day last week in Turner Valley, seeing the sights. Joseph found much to interest him in the oil field. It will be several weeks yet before he returns to his home in the U.S.A.

After an absence of seven years, Mr. and Mrs. H. C. Morrow of Alhambra, Calif., arrived last week to visit Mr. and Mrs. Harry Scott and their many relatives and friends in this district and also other parts of Alberta. As the visitors time is limited they will not be able to remain in Alberta very long.

It has been many years since the most of September has gone by without frost putting an end to most garden stuff. The farmers are still taking advantage of the splendid weather to get their threshing finished and as a result the machines are pouring grain out to capacity and the elevators are still busy.

The glove demonstration held under the auspices of the U.F.W.A. at the Meadowbrook Hall was very much enjoyed by those who attended. Some 10 pairs of gloves were made and Miss McCaig proved to be very skillful and capable as a demonstrator and stated that class was very good in doing the work. Owing to the very busy season not as many attended the demonstrations as was expected. Those who were there and made gloves were well pleased with their work and the demonstrator.

**HOW TO GET 80 CTS. FOR YOUR WHEAT**

The Gleichen Call will pay 80 cents per bushel for wheat (Basis No. 1 Northern) at your elevator. It is hardly necessary to explain that this offer is made to enable The Call's subscribers to pay up their arrears at a rate on the dollar commensurate with the current price of wheat. The plan, the Call believes will be widely acclaimed as very generous and fair.

**THE 80 CENTS PLAN APPLIES TO PAYMENT OF ARREARS; ALSO NEW SUBSCRIBERS**

On any transaction in connection with new or renewals or old arrears account, a BUSHEL OF NO. 1 NORTHERN WHEAT will be accepted at the value of 80 cents. Lower grades will also be accepted on this basis.

Credit will be given at above rate, upon receipt of graded storage ticket made out to the credit of The Gleichen Call—we do not accept wheat as settlement on any other basis.

Subscriptions for more than one year in advance cannot be accepted under this plan.

**The Call, Gleichen**

The Tomblow held last Friday night by the members of St. Victor's Church at the Meadowbrook Hall was well attended and a very enjoyable time was had by the crowd. Fr. Bryant wishes to extend his thanks to all who attended. The following were the prize winners: Mr. Cook \$5; Mr. Young \$3; Mr. Dennis \$2; Mrs. Webb won the essay donated by J. A. Vennard; Ray Cunningham landed the ham donated by R. Haskayne; the swifter was won by Mr. Ferguson and the doll donated by Mrs. Dewney was won by Lucille Cunningham.

**WHY EVERYONE SHOULD STUDY MUSIC**

A good musical education is one of the stepping stones to success and happiness. The art of music develops the sense for the beautiful. Comradship and association with people in general is very often the outcome of being able to play a musical instrument. Music helps to make every social gathering more enjoyable. Languages may vary, but music has a universal appeal.

As for the professional or business people, there is no better hobby than that of music. It is worth far more than a mere hobby—it is an outlet for expression as well as relaxation from the strain of hard work. Music is both refreshing and inspiring to the mind. No restrictions or bounds are placed on the age when a person cannot learn too. Knowledge, which remains tentative and insecure, brings a complete recognition of music in its finer sense. What an inestimable gift it is to read music as easily as literature and to appreciate its full meaning. A trained ear is needed in listening in, understanding rhythms and melodies.

All children, whether or not they show ability or interest for music should have musical training. Those who have a natural gift or tendency towards music should certainly not be neglected. Those who have no qualities indicating an inclination or tendency should be trained along some musical line, just as they are trained in the various studies at school. A child has the same claim to a musical education as everyone has a claim to happiness and enjoyment in life. It serves as excellent training for the mind, body and soul. Music has the power to develop sound reasoning, clear and fast thinking, and a good memory, all of which help in the everyday life of any person. A musical education broadens one's knowledge gives a cultural background, and adds a new pleasure and joy of life. Confidence is gained by performing before groups, which gives

on the player more assurance in his ability to do other work.

Some people think only of the pleasure derived from playing. For this reason as a luxury. Often-times parents in particular feel that music is something which the child can do without. However, the very fact that education all over the country is placing more emphasis on music study would indicate that this is the wrong attitude. Every child needs music. That is why the public
